Phone +(48) 888 439 638  
Address Cracow, Poland

Available for relocations  
for peroid of time: now - august 2017

## Education

### IT Profile Middle School, Rabka-Zdrój

In September I started learning computer science at the Rabka-Zdroj high school. I will be finishing school in 2018, gaining qualifications in the field of technical exploitation of computers, networks and databases.

## Work Experience

### FREELANCER 01.2015

In January I started to execute individual orders, mostly for small local businesses. I took care of SEO, company promotions and technical background.

### DHOLE DESIGN 10.2015

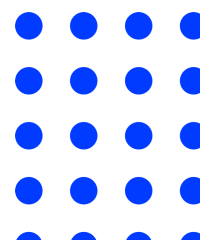

In October I started working with another freelancer under the brand I created from scratch - Dhole Design. We designed and implemented websites for companies across Poland and Europe. Dhole Design gained experience with simple websites as well as with advanced custom e-commerce systems.

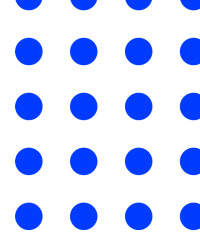

### INTERNSHIP AT MILENIUM.IT 02.2016

It was the internship, which had to take place during the school year. It lasted two weeks, I could choose any company and apply there. My choice was milenium.it, the company where primary backend technology was Django.

### INTERNSHIP AT VEDIUS 03.2017

As previously, this internship took place during the school year and lasted two weeks. I chose Vedius company in which I increased my Django and Frontend skills, creating project 'Cyfrowa Szkoła' and new Vedius website.

## Awards

### Google Code-In 2015 Winner

The Google Code-In is an international competition aimed towards young aspiring software developers from around the world, lasting 2-3 months. During the competition we perform tasks for one of 14 open source organizations; my choice was Sugar Labs. In my year, there were 24 winners, two from each organization. I was lucky enough to be one of the winners, and in fact the only one from Poland. We won a few days in San Francisco and much more.
